

YOUR ESSENTIAL INCIDENT RESPONSE ACTION PLAN

Don't wait for a security breach to happen. Be proactive and plan your incident response now to address and mitigate potential threats effectively.

THE FOUR STAGES OF NIST'S INCIDENT RESPONSE LIFECYCLE

1

Preparation and planning

Prepare for potential threats by identifying assets and risks and forming a response team.

2

Detection and analysis

Stay ahead of threats by quickly identifying and analyzing common attack vectors.

3

Containment, eradication and recovery

Act fast to eliminate threats and restore systems effectively.

4

Post-incident activities

Learn from incidents and improve security measures to stay ahead of the game.
